UI/UX Designer (5 years) delivering end-to-end product design across **Maritime, AI, Cybersecurity, Healthcare, Education, ERP, Finance, Aviation, and Fintech**. Started as a frontend developer, an early foundation that still shapes how I approach design today. That grew into a genuine focus on solving everyday problems for users, developing design systems, conducting user research, wireframing, prototyping, and usability testing, always aimed at turning something clunky into something intuitive. Along the way, I've **collaborated with international clients across Singapore and Australia**, relearning new industry context again and again without losing the core design instinct underneath it. Proficient in Figma, Adobe Creative Suite, and front-end technologies (HTML, CSS, JS), with a focus on accessibility, consistency, and aligning user needs with business goals to deliver intuitive, high-impact experiences.

EXPERIENCE

1. Senior UI/UX Designer | Freelance | Self-Employed

Sep 2025 - Present

Specializing in identifying and resolving the most difficult supply chain, logistics, and transport challenges, working with clients including one of the world's largest operators of product and chemical tankers.

- **AI-accelerated workflow:** Used AI tools including Figma AI, Figma Make, Claude, Stitch, and Lovable to speed up visual exploration and prototype interaction states, cutting repetitive production work without compromising design quality.
- **Platform-wide design audit:** Ran a full audit of the existing platform across component libraries, tokens, UI patterns, and interaction standards, systematically improving consistency across desktop and tablet.
- **RBAC design:** Contributed to role-based access control design, translating complex permission requirements into a clear, scalable structure across multiple user types.
- **Accessibility-first design:** Designed with WCAG and usability best practices in mind, ensuring interfaces stayed intuitive for a broad user base, including users aged 70+.

2. UI/UX Designer | Life Management Science Labs

Mar 2024 - Sep 2025

A lifestyle enablement platform spanning wellness, art, and personal growth ecosystems.

- **Unified a multi-platform ecosystem, lifting engagement by 30%:** Redesigned and unified LMSL's ecosystem across web and mobile by leading UX strategy, building a scalable design system, and aligning cross-functional teams, resulting in a 30% increase in user engagement.
- **Designed a wellness app integrating events, courses, and consultations into one journey:** Led end-to-end design of a personal wellness mobile app, unifying events, courses, podcasts, and consultations into a cohesive information architecture, supported by usability testing and KPI-driven iterations to boost engagement and retention.
- **Owned end-to-end design for a global art community platform:** Designed Artaevita, LMSL's platform connecting artists, curators, galleries, and collectors through curated exhibitions, commissions, and online sales, owning the full experience from information architecture through high-fidelity UI.
- **Improved learning outcomes on an EdTech platform through UX refinement:** Improved UX for LERERO by refining user flows, conducting heuristic evaluations, and building scalable, consistent design components, boosting task completion and overall learning experience.
- **Reduced checkout drop-off using behavioral session data:** Reworked the checkout flow for Aegenda, a fashion e-commerce brand, using Hotjar session data to identify drop-off points, streamline purchase steps, and introduce engagement cues that moved hesitant users toward conversion.

3. UI/UX Designer | Freelance UI/UX Designer (SkyLeap , Inductiv and Incube Tech)

Dec 2023 - Feb 2024

Delivered end-to-end design across cybersecurity (SkyLeap), fintech (Inductiv, a Singapore-based AI product, worked remotely from Nepal, my first AI-native product), and EdTech (Loksewa, 10,000+ downloads), turning complex, high-trust domains into intuitive, production-ready interfaces.

- **Designed browser-native Zero Trust security for enterprise workspaces:** Built SkyLeap, a Chromium-based browser for managed enterprise workspaces where security lives in the browser itself rather than behind remote isolation, a gap observed while building cloud-isolation products at Zscaler. The product didn't find its market, but the engineering went deep into Chromium internals and production browser operations.

- **Delivered end-to-end design for an AI-powered fintech decision platform, remotely for a Singapore-based product:** Owned research through delivery for Inductiv, a privacy-first, AI-powered decision intelligence platform for finance professionals, working remotely from Nepal. Conducted user research, wireframing, prototyping, accessibility, and usability testing, translating complex financial data and AI-driven insights into interfaces finance professionals could trust and act on with confidence.
- **Designed a civil service exam prep app that reached 10,000+ downloads:** Built Loksewa, an EdTech mobile app for Nepal's civil service exam candidates, for agency client Incube Technologies. Covered quizzes, practice sets, courses, audio/video lessons, and offline access, earning strong positive user feedback.

4. UI/UX Designer | Rara Digital Labs Pvt. Ltd.

May 2022 - Dec -2023

A product design & development studio building digital products across fintech, data processing, and enterprise, serving 30+ clients.

- **Streamlined operations with an automated EMS:** Designed an Employee Management System in Figma for HR managers and employees, integrating performance monitoring and automated reporting, reducing manual tasks and improving decision-making.
- **Designed clinical dashboards used daily in live hospitals:** Built the KPI module and Patient Dashboard for Intellix, a healthcare platform, transforming complex medical data into clear, actionable insights for clinical teams, used daily by doctors and nurses in real hospital settings.
- **Improved airport ground operations accuracy by 100%:** Designed an inventory system for Ground Support Equipment (GSE), covering item tracking, inventory management, and report generation, improving data accuracy by 100% and operational errors.
- **Delivered 3 ERP modules driving 100% accuracy improvement:** Designed HRM, User App, and FAM modules for an Myra ERP, enhancing functionality, streamlining data tracking and reporting, achieving a 100% improvement in accuracy and efficiency.
- **Designed a secure cross-border remittance experience:** Built a remittance feature for XUNO, a fintech platform, enabling individuals and businesses in Nepal to receive money from the USA through transparent, NRB-regulated exchange rates and trusted local payment rails, with a focus on data protection and user authentication.
- **Owned the full-scope design of a heliski booking marketplace:** Designed Heliski International's complete platform, website, booking web app, and admin panel, connecting travelers with curated heliski trips, full tour operator and admin systems behind it.

4. Designer and Marketing Analyst | Smart Acre Media Solutions

Sep 2021 - Apr 2022

A digital marketing and web development agency offering web design, email marketing, SEO, and social media services.

- **Boosted email engagement by 40% through responsive template design:** Designed and developed responsive email templates using HTML and CSS, optimized for mobile and desktop, driving a 40% increase in open rates & a 25% click-through.
- **Improved email deliverability by 15% through SMTP optimization:** Optimized email deliverability using SMTP protocols, increasing successful deliveries by 15% and improving overall email campaign performance.

4. Frontend Developer (Internship) | Featherwebs

Apr 2021 - Sep 2021

- **Streamlined HR workflows through interactive UI development:** Contributed to HRIS (Human Resource Information System) internal tool development, refining UI components and implementing interactive features that streamlined HR processes.
- **Built the frontend foundation that still shapes how I design today:** Collaborated with developers, designers, and stakeholders throughout the development lifecycle, strengthening communication and teamwork while gaining hands-on understanding of front-end constraints that still shapes how I design web and mobile interfaces today.

EDUCATION: Bachelors of Science in Computer Science and Information Technology

SKILLS

- **Tools & Technologies:** Figma, Figma Make, Figma AI, Claude, Lovable, v0, Cursor AI, Uizard, Stitch, Adobe Illustrator/XD/ Photoshop, Sketch, DaVinci Resolve, Procreate, FigJam, Miro, Google Analytics, Hotjar, Elementor, DeepSeek
- **Design:** UI/UX & Product Design, User Research, Competitive Analysis, Information Architecture, User Flows & Personas, Journey Mapping, Empathy Mapping, Storyboarding, Wireframing & Prototyping (Low & High Fidelity), Interaction Design, Design Systems, Responsive Design, Design Thinking (HMW), Usability Testing, Feedback Synthesis & Analysis, A/B Testing, UX Audits & Heuristic Evaluation, Accessibility (WCAG), UI & Micro-Interactions, Graphic Design, Illustration, AI-Assisted Design Workflow
- **Development:** HTML, CSS, SCSS, JavaScript, Bootstrap, Git, Basic React/Component Thinking
- **Other Skills:** Cross-Functional Collaboration, Stakeholder & Client Communication, Remote/Async Collaboration, Independent Ownership, Design Leadership & Mentorship, Agile & Scrum, Presentations & Storytelling, Engineering Feasibility Awareness, Problem Solving & Critical Thinking, Adaptability, Quality-Focused Delivery, Professional Ethics
